PROFILE

I am a dynamic and organized person who can work easily and effectively under pressure to meet set objectives. I am also a team player, and I am open to everyone's ideas and opinions to improve the ongoing processes.....

I look forward to learning new things every day and helping more people to archive their goal while doing what they love and what they do best.

WORK EXPERIENCE

Full-Stack Software Developer & Digital Marketing Expert

Freelance / Remotely / June 2021 – Present

Start Outreach - Cold Calling and Emailing potential clients such as adult artists and content creators, influencers and small to large businesses by offering them my services with a detailed roadmap with compelling arguments explaining how I can help them establish or consolidate their online presence, first, by simplifying their daily tasks, by automating repetitive tasks, to save more time and be more efficient. Then, by setting realistic goals such as increasing their sales by 10 to 25% in the next 3 months. Finally, depending on the client's core business, we create the tool that best suits their needs.

Full-Stack Software Developer

Libidoon / Remotely / Dec 2019 – Jul 2021

As Frontend Developer - I designed and developed the admin panel with **ReactJS**, **Redux** and **CSS3** from scratch.

As backend Developer - I fully designed the database (MongoDB), creating all the collections and relationships between them using **Mongoose**, and co-developed the Endpoints for the entire system, i.e., the admin panel and the mobile app, using **ExpressJS**, and **Socket.IO** for some Realtime events.

Professional Transcriber & Subtitle Creator Expert

Freelance / Remotely / Feb 2015 – Present

I started my career as a Freelancer as an audio transcriptionist working on different platforms such as **Neevo, Transcribeme, Robston, Amberscript** and **Sonix**, following complex guidelines different from each other. I have also had the privilege of working for large companies in the industry. Then, after a year, I started creating subtitles and captions.

Now, I mainly work in platforms that allow me to work at my own pace and have no minimum time requirement per week.
